IN THE OFFICE OF SUPERVISORY POLICE OFFICER NEW TOWN

DATED 2-11-2007

PUBLICAITON

GULSHAN TOWN EAST ZONE KARACHI

Case Crime No.183/2007 U/s. 302, 324, 427 PPC, 3/4 Explosive Act, 7 Anti Terrorist Act P.S. Bahadurabad East Zone Karachi.

It is hereby intimated through this notice that on 19-10-2007 after taking place of Karsaz incident the following persons who participated in the welcome rally of Pakistan of Mohtarma Benazir Bhutto, Chairpeson Paksitan People's Party are lost, their legal heirs told that after taking place of the incident of carnage the said persons have not returned to their houses respectively whose search is required.

Therefore, it is hereby appealed to please inform at the following numbers, if any, person has any knowledge about the said missing persons.

Phone No.021-9231386
Mobile No.0334-4305914

Muhammad Nawaz Ranjha
Supervisory Police Officer New Town
Gulshan Town East Zone Karachi

Zaheer Ababs S/o Shabir Hussain, Kamal S/o Abd ur Rehman, Ibrahim S/o Haji Dawood Sajid S/o Sakhat, Muhammad Bilal Saeedi S/o Muhammad Yusuf, Malik Rizwan S/o Bashir Awan, Siddiq S/o Arif Nadeem S/o Allah Rakha Azam alias Shani S/o Abdul Hafeez, Yusuf S/o Rasool Bakhsh Naseem, Jamaluddin S/o Abd ur Rehman, Sherullah Khan S/o Jalal Khan, Imran S/o Haji Muhammad Bakhsh, Muhammad Shakeel Muhammad Idrees, Hazar Khan S/o Banjaar Khan, Bilal S/o Yusuf, Abdul Latif S/o Huzoor Bakhsh, Mujeeb-ur-Rahman.

5. While reviewing the position of terrorism cases under trial or appeal in Courts, the PPO expressed displeasure over the system of monitoring of progress of such cases in courts of law. He stated that news of acquittal of Akram Lahori was read by him in news papers whereas there should have been institutional arrangements which should have informed the senior officers well in advance about the likely outcome of appeals in high-profile cases or accused.

6. Following decisions were taken:

S#	DECISIONS / DIRECTIONS	ACTION BY
i.	<u>Known Terrorists</u> PPO directed that the individuals identified in similar cases of terrorism in past and still at large, should be apprehended and interrogated to develop leads for this case and also to naturalized future designs of the terrorists.	CCPO/Karachi DIGP/CID
ii.	<u>Collection of Intelligence</u> Special Branch must gear up intelligence collection and also re-defined its priorities by dedicating significant portion of its efforts and resources on information relating to threats posed by terrorists groups.	Addl: IGP/S.B.
iii.	<u>Liaison with Intelligence Units</u> PPO directed that investigation team must established liaison with Intelligence Agencies and exchange information.	Addl: IGP/S.B. CCPO/Karachi DIGP/CID
iv.	<u>Cost of Investigation</u> On the point raised by CCPO/Karachi regarding expenditure involved in investigation of high profile cases, the PPO directed that the standing order No. 189/2003 be amended to include cost DNA test and other related items to be met from the head of "Cost of Investigation". DIG/HQ was directed to put up draft for approval.	DIGP/HQ
v.	<u>Publicity - Suicide Bombers</u> PPO observed that the photograph of two suicide bombers, re-constructed by the investigation team, must be given full circulation and published in national news papers in a manner that these appear and get provide vide publicity in all the Provinces so that proper feedback from public can be achieved.	DIGP/CID

X

Release of Accused in Terrorism Cases

DIGP/Investigation, Karachi and DIGP/CID Sindh were directed to develop mechanism for monitoring of high-profile cases, particularly the status of prosecution and appeals.

Assessment be carried on periodical bases and likely out come be indicated well in advance alongwith reason including defects in investigation etc briefing the PPO Sindh as and when warranted.

The monitoring proforma designed by Punjab Police monitoring these cases be obtained and adopted.

A panel of lawyers to defend appeals arising out of High-Profile cases be forwarded by CCPO/Karachi so that government is moved to hire their services.

East Zone CCP, Karachi.

No: 572 /T&T/General/2008, Karachi, dated: 29 -02-2008.

Subject: INFORMATION REGARDING JAMMERS-CASE FIR NO.183/2007 U/S
302/324/427/34 PPC ¼ EXLOSIVE ACT R/W 7 A.T.ACT PS
BAHADURABAD.

Please refer to your office letter No.SSP/INV/EAST ZONE/R/6770-73,
dated: 21-11-2007, on the subject noted above.

2. The requisite information is given below:

1	How many Jammers were fitted in Police Mobiles?	One Jammer each in two Jeeps
2	What was the made and origin of said Jammers?	V JAM, TURKEY
3	What were the technical specifications of the said Jammers?	Specifications are top secret
4	What were the basic functions of those jammers?	To Jam frequencies as per specifications
5	What was the locations of those Jammers in the Police Mobiles?	May be asked from Special Branch
6	What was the effective covering range of those jammers?	100 meters radius
7	Whether those jammers were functioning at the time of blast or not?	May be asked from Special Branch
8	Whether the speed of the Police Mobiles effect positively or negatively upon functioning of those jammers?	These are mobile jammers and not static jammers. At slow speeds the batteries get discharged and the jammers stop functioning due to lack of power.

SUBJECT:- INFORMATION REGARDING JAMMERS-CASE FIR NO.183/2007 U/S
302/324/427/34 PPC & EXPLOSIVE ACT R/W 7 A.T.ACT PS
BAHADURABAD.

Kindly refer to your office letter No.SPO/NT/RDR/281
Dated,29.02.2008 on the subject cited above.

It is submitted that on 19.10.2007 the undersigned was
deputed on Special Branch vehicle No.SP-1312 in which Jammer-I was
fitted and was traveling at front with truck of Mohtarmma Benazir
Bhutto, Chair Person Pakistan Peoples Party at the time of blast. The
replies to the questions mentioned in above referred letter are as
under:-

- 1) The Jammer-I was fitted in the rear portion of the vehicle
- 2) As the speed of the vehicle was almost zero, therefore
being a mobile jammer after a prolong journey passing 8
hours the batteries of the jammer was discharged. Due to
the reason the jammer was not functioning at the time of
blast.

Muhammad Saeed Gujjar 02/03/08

BOMB BLAST REPORT

(Signature)

48

1. Date of occurrence : 19-10-2007
2. Time of occurrence : 0010 hours
3. Exact Location : Approximately 100 meters ahead of Karsaz Bridge on Shakra-e-Faisal leading from Airport towards Shaheed-e-Millat Flyover i.e. procession was coming on the wrong side of dual carriage way.
4. Reporting Agency : Nil, party ahead of procession reacted.
5. Time of reporting : Nil.
6. Time of inspection : 0025 hours.
- Report
7. Nature of incident : Undersigned was the Incharge of BD team No. 01 and was proceeding alongwith BD team approximately 100 meters ahead of procession, at 0010 hours I heard a blast of low intensity, within 1 to 2 minutes I heard another blast of much higher intensity. I rushed to the place of occurrence immediately. A stamp took place, and party at tail of the procession also joined at the spot. At 0025 hours alongwith SI Masab Hussain, I inspected the site of the blast which was in between Police mobile No. SP-6510 and Mini Pejaro A/R chassis No. A-111-G 0042-48. Car Santro Hyundai without Number Chassis No. 615566 was behind the Pejaro mentioned above. In the first blast probably a dynamite cartridge fired and the second blast was approximately 12 KGs high explosive (plastic explosive), pellets mixed. Affects of both the blasts intermingled due to second heavy bomb blast.
8. Found / recovered : Nil, except 5 steel pellets of 4 mm found/ recovered at place of incident. Such full flagged Bomb blast does not leave behind any residue.
9. Detail of Crater : Not formed.
10. Loss / damage : Reportedly 126 persons died and more than 400 sustained injuries. Three Police mobiles SP-6510, SP-6501, SP-6472 and three private vehicles i.e. Mini Pejaro, Sentro (Hyundai) and Suzuki KE-9067 were damaged. Windscreen of the truck (Container) broken, left side door pressed in side exhaust fan and A/C fan damaged due to heat. Front left wheel damaged. Rostrum glass cracked, one at front side and tree at left side of rostrum glass pellets marks observed. 63 pellets marks observed on left side of truck (container) which did not pierce.
11. Possible Observation : The bombs were not planted or remote control detonated, because, no crater was formed on the spot or no major hole was made in the vehicle damaged, otherwise in the case of planted/remote control bomb blast crater is always formed. As no crater was formed hence it was an act of terrorism in which the terrorist was carrying high explosive (PE) on his upper body, which he exploded through push button device. The heavy blast occurred in between Police mobile SP-6510 and Mini Pajero, as the Police mobile was damaged and the impact was to the right side and the Mini Pajero damaged and impact was to the left side. All the marks on pellets struck on Police mobiles and damaged vehicles were struck from outside and their affects were from outside to inward as the prongs were protruded inside. The terrorists most probably kept the high explosive (PE) on his chest. Plastic explosive being pliable is easy to form shape and mixing of pellets and majority of the people suffered their injuries on upper parts of the body.

Human DNA Profiling

Case: Suicide Attack at Kharak Kharochi

LAB Ref. No. ANALYSIS/01/08

Sample:

Three tissue (Brain, Face and Head) samples belong to a suicide attack on 18th March at Kharak Kharochi were sent to by Prof. Dr. Abid Azhar, Co-Director (IBGE), Karachi Institute of Biomedical and Genetic Engineering (IBGE), Karachi on 18th Islamabad for DNA profiling and comparison on 16th April 2008.

Analysis:

DNA was extracted from the tissue samples and amplified by using AmpFISTR. The PCR products of the three tissue samples were compared with appropriate positive, negative controls and allelic ladders on ABI-3130XL Genetic Analyzer and DNA profiling was carried out by using GeneMapper 4.0 software.

Conclusion:

- All three samples of Brain, Face and Head are of male individuals.
- The DNA profile generated from each tissue was different from each other. It concludes that the three samples (Brain, Head and Neck) belong to three different individuals and they are not biologically related to each other.

FACT SHEET**SUICIDE ATTACK ON BENAZIR BHUTTO'S CONVOY ON
SHAHRAE FAISAL KARACHI ON 19-10-2007**

1. FIR No: 183/2007, U/S 302, 324, 427, 34 PPC, 3, 4 Explosives Act, r/w 7 ATA, PS Bahadurabad, Gulshan Town, Karachi
2. Place and Time of Occurrence 19-10-2007, 0010 to 0012 hrs, Main Shahrae Faisal, near Karsaz Fly Over.
- Number of Victims: 117 dead (including 06 police personnel and public)
Injured 310 (including 23 police personnel)
4. Target: Benazir Bhutto, her party officials and supporters
5. Type of Weapon used: Suicide Bomber
6. Types of Transport used by the Accused: By foot
7. Recoveries made from the Crime Scene:
- a. Facial skin of the suicide bomber.
 - b. Steel balls.
 - c. Striker sleeve used in triggering mechanism, recovered from the epicenter
 - d. A damaged mobile phone SIM DTMI 03302092540
 - e. Collection of mud sample general from 100 feet of epicenter.
 - f. Explosive sleeve hard
 - g. Explosive sleeve mud type
9. Likely Suspects/ Accused: Unknown
10. Brief Facts: Benazir Bhutto arrived in Karachi on 18th October 2007 from Dubai after self imposed

exile of eight years at 1338 hours. Her convoy moved very slowly from the Jinnah International Airport. The convoy crossed Karsaz fly over and moved about 100 meters towards the city. At about 0010hrs an explosion occurred. Within a minutes time another louder blast occurred which badly damaged two police mobiles on the left flank, and two private vehicles also adjacent to the police mobiles. The blast damaged another police mobile and a Suzuki pickup. The driver cabin of the truck carrying Benazir Bhutto also got damaged. Rest of the truck remained safe. The bullet proof chamber withstood the force of blast and the pellets did not penetrate the iron sheets. As a result of the blast about 117 persons died and 310 received injuries. Benazir Bhutto and her party leaders on the truck mainly remained safe. 06 police personnel died in the blast and 23 received injuries.

11. Current Findings:

SIG Team visited the crime scene, Photographed and sketched the area. The bomb expert Major Shafqat also inspected the scene and thoroughly analysed the crime scene and has submitted his report. He recovered the striker sleeve from the epicenter. This confirmed that the bomb had a manual triggering mechanism further proving it as a suicide blast.

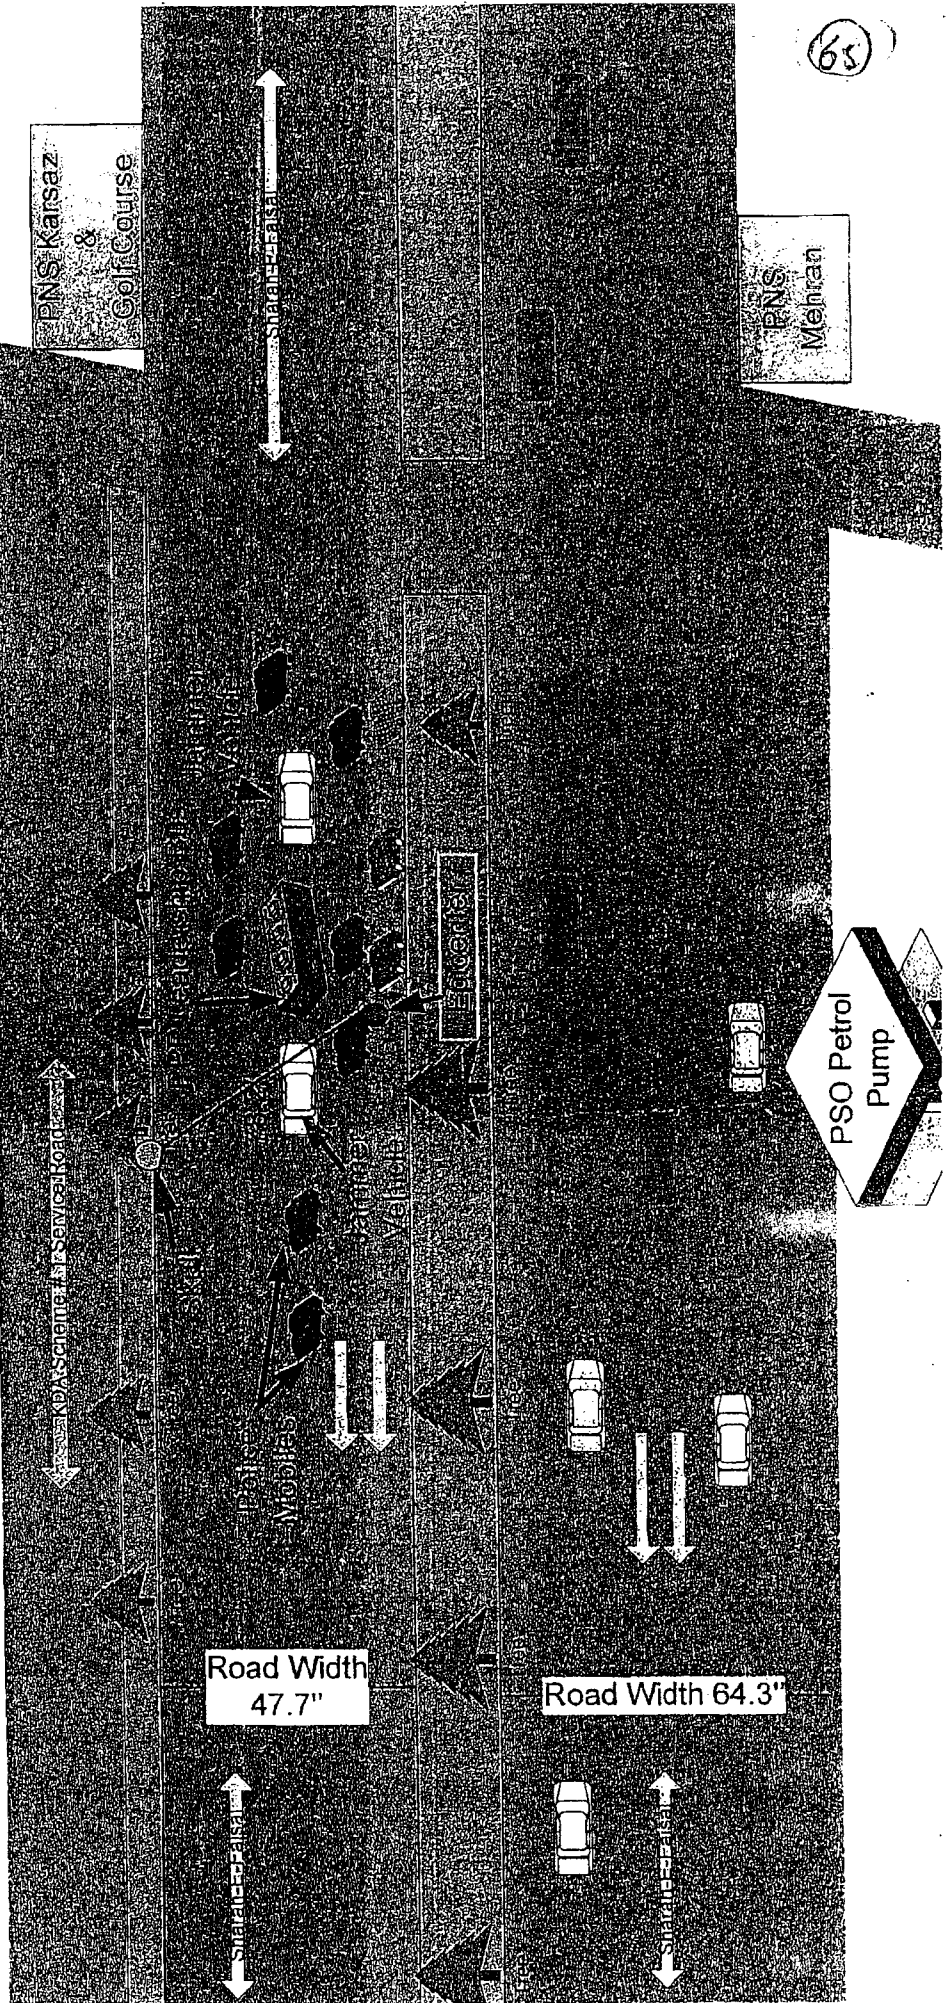

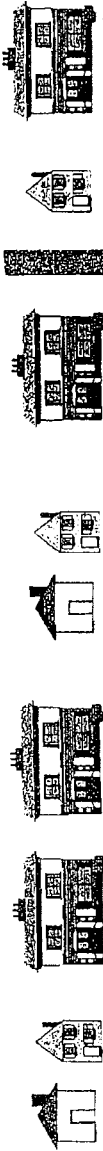

12. Analysis:

On the basis of analysis of crime scene the SIG team has concluded it as a suicide attack. The first blast took place and after one minute of it another louder blast took place. Investigations are underway to establish the cause of the first blast. No evidence of a hand grenade was found from the scene. The SIG team photographed one half facial skin with one eye, some hair, skull bone and nose at the crime scene. There was no crater at the scene. The officers recovered multitude of steel balls used in ball bearings which caused major casualties, similar to previous blasts in the country. The motive appears political /jihadi. The likely suspects are Taliban militants fighting the government forces in the FATA.

Phase B-11
KDA Scheme # 1

Explosive Expert Report on Suicidal Attack in Karachi on 19-10-2007

1. General

Reportedly, a suicide bomber blew himself at the caravan of ex- Prime Minister Benazir Bhutto near Karsaz Bridge at Shara -e -Faisal at about 0010 hours on 19 October 2007. Resultantly 117 persons were killed including suicide bomber and 310 persons were injured. Amongst killed, six police personnel are included who were escorting the special truck being used by Benazir and the senior leaders of the party. **It is pertinent to mention here that brunt of the attack was borne by police vehicles escorting VIP bullet proof truck.** The blast occurred near Karsaz flyover, when the caravan was crossing it on its way to Mazar-i-Quaid. The VIP truck was escorted by 08 police Toyota Hilux mobiles along with two jammer vehicles. The jammer vehicles also got little damage under the influence of blast wave. Three private vehicles also came under the blast wave and got damaged. One vehicle was burnt completely but no sign of detonation was observed inside the vehicle during inspection.

2. Visual Observations

- a. Two sounds were heard by the witnesses within the interval of one minute. The intensity of first blast was low whereas other blast was of high intensity with cracking sound.
- b. Body of striker sleeve MUV-2 was recovered from the epicenter buried under the debris of blast but damaged due to heavy traffic flow on the busy road of Shahr-e Faisal. **Its lot number was not legible most probably due to effects of burning and flow of traffic.** There is likely chance that

terrorists group has intentionally removed the markings to avoid any linkages and identification.

- c. Damaged vehicles were examined. Eight police mobiles were escorting the VIP truck. Three mobiles near the epicenter at the left side of the truck got the maximum brunt. The mobile no SP 6510 right at the epicenter completely collapsed from the rear side. Most probably, suicide bomber was intercepted by the police mobile which got maximum damage. The mobile created a barricade between the suicide bomber and VIP truck, thus saving the latter from lethal effect of the blast. Three private vehicles driving near the epicenter at the left side of the VIP truck also came under blast wave and got damaged. One private vehicle got fire and was burnt completely. It was examined thoroughly but no traces of explosives and effect of detonation were observed. The floor of the car was intact which negate the assumption that any explosive was placed inside the vehicle. More over, the body of the car was observed bulging inwards which substantiated the evidence that it surfaced the blast pressure from outside. The VIP truck also received blast wave, but its effect was localized mainly due to two reasons. Armour plate has been used and truck was made bullet proof. More over its height was measured 16.2 feet where open atmospheric pressure would decrease the intensity to bare minimum. **Around sixty three pellets struck the body of truck but could not penetrate into it. Reportedly, few persons riding on the rooftop of truck got minor injuries.**
- d. Reportedly, facial scalp of one suicide bomber was found at a distance of 78 feet from the epicenter. A complete head with lower part of body was also examined in the hospital. **Pellet holes were observed which revealed that these were struck from the 'outside' which negate the assumption that it was a head of suicide bomber.**

- e. No crater of any size was observed at the epicenter of suicide attack.
- f. No piece of any type of hand grenade was observed.
- g. Ball bearings were recovered from the crime scene. Pellets holes were observed on the dead bodies and damaged vehicles.
- h. No splinter of any type of shell or mortar bombs were recovered from the crime scene

3. Modus Operandi:

The suicide bomber managed to reach near the vicinity of the VIP truck. Amid tight security, he exploded himself near the police mobile following the 1st blast as primary devise. There are likely chances, first blast might have been caused by another suicide bomber who was probably wearing jacket with low quantity of explosive as deception plan to create dent in local defense of the VIP truck under the influence of harassment and panic. The second suicide bomber took the initiative and exploded the explosive belt wrapped around him by pulling the safety pin of striker sleeve within the interval of one minute. The striker under the compression of spring struck the detonator, screwed in front of sleeve which in turn detonates the main charge of "High Explosive". The manual triggering mechanism was used by the suicide bomber to detonate the explosive jacket. The evidence has been substantiated with the recovery of striker sleeve MUV2 from the crime scene.

4. Blast effect

The blast wave traveled in all the directions above the ground. The detonation wave traveled parallel to the ground at the height of approximately 4-5 feet causing

maximum damage to men and material. The brunt of the waves was surfaced by the police mobile and huge crowd in the vicinity of epicenter. The blast wave traveled up till the distance of 200 feet. Window panes of buildings at right of epicenter located at a distance of 170 feet were found broken with blood stains. It revealed the intensity of blast wave. The ball bearings embedded in the layers of explosive traveled in all the directions causing severe damage to men and material under the influence of blast wave. Definite pattern and pellet holes were observed on the dead bodies and vehicles. The holes ranging from $\frac{1}{2}$ to 2 inches making through and through holes on bodies of damaged vehicles and dead bodies. 63 pellets struck the VIP truck but could not penetrate into it due to armour plate thus causing negligible damage to the occupants. Both the blasts occurred with interval of one minute therefore, waves could not augment each other otherwise it could travel at far distance with more intensity enhancing the damage. The interval between the blasts could not increase the radius of killing zone but it definitely ensured complete collapse within the zone.

5. Type of Explosive

High explosive approximately 10 to 12 kg has been used by the second suicide bomber. Whereas first suicide bomber if any has used less explosive but its exact quantity can not be presumed with the factors of detonation and blast waves as both the blasts almost occurred in the same vicinity with interval. The only indicator to assume quantity of first explosive is the intensity of sound which was observed less besides its effects on men and material. Its effects were also less than the 2nd blast as the latter suicide bomber survived after the first blast. The exact nomenclature of explosives would be ascertained from the laboratory.

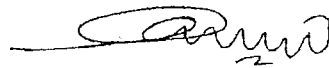

Opinion / Linkages:

1. It is a target suicide bombing with definite motive and aim. The target was well rehearsed and reconnaissance was carried out. The deception plan using the idea of primary and secondary devices was organized to achieve completely positive results but tight security and use of bullet proof truck by the management for ex-Prime Minister has foiled the objectives of concerned terrorist organization. The suicide bomber has used manual triggering mechanism which is more accurate and could not be jammed by any sort of jammer. It clearly revealed that terrorist organization was in the knowledge that caravan will be secured with the jammers. They also have the expertise that manual triggering mechanism cannot be addressed with electronic jammers.
2. It is first suicide attack in Karachi in Sindh Province of the current year 2007. Chronologically, this suicide bombing is 28th of the year and first in the month of October 2007. The intensity of suicide bombing has increased many folds after the Lal Mosque episode with small break in the month of October most probably due to holy month of Ramazan. **Since that incident, 18 suicide bombings have occurred in Islamabad, Punjab, NWFP and now in Sindh. Eight times, explosives laden cars have been used by the suicide bombers whereas in 20 incidents no vehicles were used. Modus operandi and triggering mechanism used in 11 suicide bombings is manual and mechanical by using the striker sleeve MUV2, with same lot numbers and factory code except little variation of manufacturing year.** The striker sleeve was used in City Court Quetta, Dalgrim Bazar Peshawar, Marhabba hotel Peshawar, EME Mosque Attack Kohat, Charsadda blast, both the suicide attacks in Rawalpindi and all the three attacks of D. I. Khan.

71

This analysis is a clear indicator and reveals that a specific group is involved in at least 11 cases including this one.

Dated 20th October 2007

1. GENERAL PARTICULARS:

1. By whom was the corpse sent? SHO Bhadrach
2. By whom was the corpse brought? Inspector Malik Raees
3. By whom identified (1) _____
(2) _____
4. (a) Exact time of its receipt 1.15 AM
(b) Exact time of beginning P.M. Examination. 3.45 AM
(c) Exact time completion of P.M. Examination. 4.10 AM

5. Substance of accompanying report from Police Officer, Magistrate, together with the date of death - If known, supposed cause of death or reason for examination.

Death in the Jurisdiction of
P.S. Bhadrach
from Bomb Blast, papers
Submitted for post mortem
to ascertain the cause of death on

11. EXTERNAL EXAMINATION:

6. Sex, Apparent Age, Race etc.
7. Description of clothes or ornaments, on the body.
8. Condition of the body.
9. Special marks on the body.
10. Condition of the clothes.

External Basis.
Male, muslim, age 35-37
years
Surname: Ghaur Kemrez and Shalwis
Fresh and blood stained
old, used, and blood stained

11. Rigor Mortis: Started
12. General description about feature extent and sign of de-composition, presence of post Mortem lividity, (P-M-L.)
Position of Tongue, State of pupils, oozing from mouth, nostrils, ear, etc.

mouth closed, Tongue inside
mouth.

Developing
General Features are
identifiable. No signs of
decomposition. P.M.L. in
dependent parts. No
oozing from E.N.T.
Eyes closed, Pupils dilated

(2)

13. Surface wounds and injuries

① Lacerated Wound $2\text{cm} \times 0.5\text{cm}$ Right Side of cheek.

② Punctured Wound $1\text{cm} \times 1\text{cm}$ Right Upper arm. $\frac{7}{8}$ Margins inverted

③ Punctured Wound $1\text{cm} \times 1\text{cm}$ Right mid of Chest, anteriorly. $\frac{7}{8}$ Margins inverted

④ Punctured Wound $1.5\text{cm} \times 1\text{cm}$ Left mid of Chest $\frac{7}{8}$ Margins inverted

⑤ Punctured Wound $1.5\text{cm} \times 1\text{cm}$ Right Iliac fossa. $\frac{7}{8}$ Margins inverted

14. Can you say definitely that the injuries shown against no. 13 antemortem injuries.

yes

(3) b. v.

BENAZIR BHUTTO

RECONCILIATION

Islam, Democracy, and the West

London · New York · Sydney · Toronto

A CBS COMPANY

went up to 179 dead and nearly 600 wounded, some disabled for life. Yet the flame of hope burned so brightly that one mother told me, "I lost one son—I would sacrifice another to bring change." A young widow, married two months earlier, said her husband insisted, "I will take Bibi home safely and then return even if I have to give my life." Humera Alwani, a PPP parliamentarian, told me she had heard a chief minister say on television, "Benazir's procession will be over after midnight and she will never get to Bilawal House [my home]." The first bomb struck at 12:06 A.M. on the morning of October 19, 2007. Later, as I watched a video of the blast, I could hear the faint cry of "*Jeay Bhutto*"—"Long live Bhutto"—from the wounded as they lay dying in the streets.

Back at Bilawal House, our first thought was to arrange blood for the wounded and ensure they got to the hospital. Twenty of the dead around the truck could not be identified. They were so badly blown up that only body parts remained. Sixteen of them had heads separated from the bodies. We plan to bury them in the shadow of my father's final resting place at Garhi Khuda Bux Bhutto in my hometown of Larkana with honor and respect. Every year when the party gathers from the four corners of Pakistan to pay tribute to my father on the anniversary of his martyrdom, we will pray for the victims of Karsaz, the bridge near which the explosions took place in Karachi.

Later I was informed of a meeting that had taken place in Lahore where the bomb blasts were planned. According to this report, three men belonging to a rival political faction were hired for half a million dollars. They were, according to my sources, named Ejaz, Sajjad, and another whose name I forget. One of them died accidentally because he couldn't get away fast enough before the detonation. Presumably this was the one holding the baby. However, a bomb maker was needed for the bombs.

Enter Qari Saifullah Akhtar, a wanted terrorist who had tried to overthrow my second government. He had been extradited by the United Arab Emirates and was languishing in Karachi Central Jail. According to my second source, the others present at the meeting

Rank Inspector/SHO

Today a letter No.CCPO/RDR/77169, dated:17-10-2008 issued by CCPO Karachi is received at this PS for registration of FIR on the complaint of Mohtarma Benazir Bhutto. Copy of complaint is as under:- October 21, 2007. The SHO Bahadurabad Police Station Karachi. Subject: REGISTRATION OF CASE (FIR). The Pakistan Peoples Party government which I led was undemocratically dismissed from power during my second term in office in 1996 although I enjoyed the confidence of the Parliament and the people. With a view to eliminate my leadership, special laws, bureaus and courts were established to prosecute and keep me trapped in a web of litigation and prevent me from having a fair chance to contest elections or promote the views of my party. Consequently I was compelled to go into exile in 1999 due to this persecution by the state apparatus. From exile I led my party, which obtained the highest number of votes in the general election of 2002, proving that the people of Pakistan had confidence in my leadership. To prevent my party and the people from forming the Government the session of the parliament was indefinitely postponed and coalition government with only one majority vote was installed after forcing defections from my party. I continued striving for the rights of the people and announced my home coming for the 18th of October 2007. I was informed by the Government that certain militants groups wanted to attack me. After receiving this information I wrote a letter dated 16th October 2007 to the President of Pakistan informing him of my grave concern regarding my security and specified the forces and persons behind them whom I suspected were likely to harm me physically. On 18th October 2007 I took off from Dubai via Emirates Air Lines reaching Karachi Airport around 1:40 PM. After necessary formalities, I with my party men boarded the truck which proceeded slowly due to millions of people who had came from across the country to receive me. We traveled only a couple of miles towards Mazar of Quaid Azam where a public address was scheduled reaching near "Karsaz" in about 10 hours. While I was on the truck two powerful bombs exploded in quick succession. The human shield around my truck bore the brunt. About 140 people including the police squad were killed and several hundred gravely wounded. Vehicle near the front left side of my truck were blown and burnt. I narrowly escaped the assassination attempt on my life. The dastardly attack was aimed at my physical elimination and elimination of the top leadership of the party and devoted selfless supporters in an attempt to derail the democratic process and stop the people of Pakistan voting for a leader of their choice. This attracts offences under the Pakistan Penal Code, Anti Terrorism Act as well as Explosive Act resulting in the death of nearly 140 and injuring more than 350 innocent Pakistanis. You may please register the case and investigate so that the accused and their conspirators may be brought to book and punished according to the law. Signature in English. Mohtarma Benazir Bhutto Chairperson Pakistan Peoples Party Bilawal House, Karachi.

Police Proceeding: I SHO/Inspector Hussain Ahmed Nasir Lodhi, PPM hereby verified the facts and contents of the complaint of the applicant registered word to word of application. According to the application the offences under section 302/324/427/109/120-B/34 PPC, 3/4 Explosives Act r/w 7 ATA made out. Hence case is registered and copies of the FIR are being distributed as per police rules. The investigation of this case is entrusted to the DSP Muhammad Nawaz Ranjha, SPO Jamshed Quarters as directed by the senior officers. (-Sd- Inspector Hussain Ahmed Nasir Lodhi, PPM, SHO PS Bahadurabad 17/10/2008 Karachi)

HISTORY OF SUICIDE BOMBING IN KARACHI (2002 TO 2007)

Karachi witnessed the first ever suicide bomb blast in Pakistan on 08-05-2002 when a member of Harkat-ul-Mujahideen Al-Alami (HMA) exploded his explosive laden vehicle with the P.N Bus carrying French Technicians resulting in death of 17 including twelve French Nationals.

2/ Ever since 2002, Karachi has been target of suicide bombers in nine instances till to date (annex-A). It is worth mentioning that out of nine cases H.M.A has been involved in two cases in year 2002. While in remainder 6 cases of suicide bombing Lashkar-e-Jhangvi has been culprit in five cases, while Al-Qaeda's affiliate has been involved in suicide bombing of US Consulate in the year 2006.

3/ Lashkar-e-Jhangvi mainly targeted Shia Mosques and Religious leaders in Karachi. In majority of the cases the suicide bombers were residents of Karachi hailing from different ethnic groups from Punjabi, Memon and Bengalis. These suicide bombers were in turn brain-washed by "USTADS" mainly from Karachi who had earlier trained and fought in Afghan Jihad.

4/ Its worth mentioning here that all the previous suicide bombing cases have been detected and mostly the perpetrators/ masterminds/ associates have been nabbed.

(113)

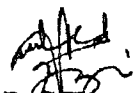

5/ However, after hiatus of almost one and a half year the suicide bombers appears to have staged a powerful resurgence by targeting Mohtarma Bēnazir Bhutto's rally on 18/19th October. In order to attain maximum casualties the two explosions took place within space of 30-50 seconds in close proximity of truck carrying Benazir Bhutto. Likewise due to tight security of Police the suicide bombers could not achieve their nefarious aim but their attempt caused horrendous casualties i.e. 140 plus dead and more than five hundred injured. According to the experts, the suicide bombers used 12 to 15kgs of high explosives in the latest case along with ball bearings for maximizing the lethal effect.

6/ Most of the impact in the 2nd blast at (annex:-B) was sustained by the police mobile which effectively shielded the Mohtarma's truck. A head without a torso was recovered (annex:-C) from the scene which has been duly photographed with the help of NADRA's experts with the objective of obtaining positive match through its data. Likewise yet another severed head in two halves has also been recovered from the scene of suicide bombing which has been duly photographed at (annex:-D). The earlier head recovered of the suspected bomber has been given wide publicity in the national press along with incentive of 5 million reward money at (annex:-E).

7/ Presently, hectic efforts by various investigative teams are being made which will Inshallah bear fruit soon in positive detection of the perpetrators of this heinous crime.

114

8/ A list of prime suspects in the latest case is being attached herewith as (annex:-F). It is not out of place to mention here that Bait-ullah-Mehsud, an Al-Qaeda affiliate, had threatened Benazir Bhutto publicly with suicide bombings. In view of the above, there is a strong likelihood of Al-Qaeda or its affiliate's involvement in the present case.

FACT SHEET
SUICIDE ATTEMPT BENAZIR BHUTTO'S CONVOY
ON SHAHRAE FAISAL KARACHI ON 19-10-2007

1. FIR No: 183/2007, U/S 302, 324, 427, 34 PPC, 3, 4 Explosives Act, r/w 7 ATA, PS Bahadurabad, Gulshan Town, Karachi
2. Place and Time of Occurrence 19-10-2007, 0010 to 0012 hrs, Main Shahrae Faisal, near Karsaz Fly Over.
3. Number of Victims: 117 dead (including 06 police personnel and public)
Injured 310 (including 23 police personnel)
4. Target: Benazir Bhutto, her party officials and supporters
5. Type of Weapon used: Suicide Bomber
6. Types of Transport used by the Accused: By foot
7. Recoveries made from the Crime Scene:
 - a. Facial skin of the suicide bomber
 - b. Steel balls.
 - c. Striker sleeve used in triggering mechanism, recovered from the epicenter
 - d. A damaged mobile phone SIM DTMI 03302092540
 - e. Collection of mud sample general from 100 feet of epicenter.
 - f. Explosive sleeve hard
 - g. Explosive sleeve mud type
9. Likely Suspects/ Accused: Unknown

10. Brief Facts:

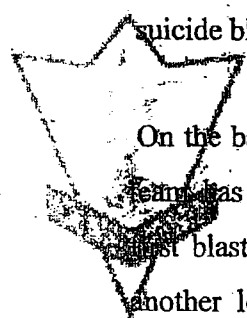

Benazir Bhutto arrived in Karachi on 18th October 2007 from Dubai after self imposed exile of eight years at 1338 hours. Her convoy moved very slowly from the Jinnah International Airport. The convoy crossed Karsaz fly over and moved about 100 meters towards the city. At about 0010hrs an explosion occurred. Within a minutes time another louder blast occurred which badly damaged two police mobiles on the left flank, and two private vehicles also adjacent to the police mobiles. The blast damaged another police mobile and a Suzuki pickup. The driver cabin of the truck carrying Benazir Bhutto also got damaged. Rest of the truck remained safe. The bullet proof chamber withstood the force of blast and the pellets did not penetrate the iron sheets. As a result of the blast about 117 persons died and 310 received injuries. Benazir Bhutto and her party leaders on the truck mainly remained safe. 100 police personnel died in the blast and 23 received injuries.

11. Current Findings:

SIG Team visited the crime scene, Photographed and sketched the area. The bomb expert Major Shafqat also inspected the scene and thoroughly analysed the crime scene and has submitted his report. He recovered the striker sleeve from the epicenter. This confirmed that the bomb had a manual

triggering mechanism further proving it as a suicide blast.

12. Analysis:

On the basis of analysis of crime scene the SIG team has concluded it as a suicide attack. The first blast took place and after one minute of it another louder blast took place. Investigations are underway to establish the cause of the first blast. No evidence of a hand grenade was found from the scene. The SIG team photographed one half facial skin with one eye, some hair, skull bone and nose at the crime scene. There was no crater at the scene. The officers recovered multitude of steel balls used in ball bearings which caused major casualties, similar to previous blasts in the country. The motive appears political /jihadi. The likely suspects are Taliban militants fighting the government forces in the FATA.
